*US Series* Corded Burnishers

# The Quiet, Economical, Fume-Free Way to a High Gloss, Dust-Free Shine

From the economical US 1700, to the feature-rich US1500, US 2000, or US 2500, the US series of corded burnishers offer a wide choice of speeds and features tailored to the users needs.

The US Burnisher series is ideal for hospitals, schools, and areas requiring dust-free, quiet and fume-free operation, while producing the brilliant high-gloss shine.

## Dust Recovery System

“Integrated Dust Control” system helps control powdering that occurs at high speeds. Easily replaced bag is housed in a rugged steel enclosure. Dust containment skirt reduces noise levels while creating excellent vacuum action.

## Folding Handle

“Polisher” style handle folds and locks to minimize storage space . Safety interlock switch prevents accidental start-ups.

## Flexible Pad Driver

Follows the contours of the floor. “Harpoon” type grip face reduces pad expansion that occurs at high RPM’s and increases pad life.

The US 1700 fixed handle and balanced design allow the operator positive control and reduces operator fatigue.

US 1700 features a quick and easily removable handle for ease of storage and transport.

### WHO USES THIS MACHINE?

- Healthcare
- Schools
- Food stores
- Cleaning contractors
- Public facilities

### WHAT DOES IT DO BEST?

- Produces brilliant high-gloss finish
- Operates quietly
- Recovers airborne dust
- Reduces operator fatigue

### WHAT MAKES IT EASY TO USE?

- Folding handle
- Large easy-roll wheels
- Super flexible power cord
- Stores easily

### WHAT ENHANCES ITS PRODUCTIVITY?

- Powerful pad driver motor
- Adjustable pad pressure
- Flexible pad driver
- Disposable dust recovery bag
- High speeds quickly produce high shine
- Long power cables reach further

### WHAT ADDS TO ITS DURABILITY?

- Rugged cast frames
- Tough powder coated finish
- Strong handle tubes
- Wraparound bumper
- Steel dust bag enclosure

### WHAT ARE ITS SAFETY FEATURES?

- Nonconductive operator's handle
- Circuit breaker protection
- Pad pressure indicator
- Safety interlock switch mechanism
- Fume-free operation
- Hospital Grade Plug
